

A modern office interior featuring a row of pink smart lockers on the left. In the center, a woman in a yellow top and a man in a grey jacket are talking against a wood-paneled wall. The foreground shows a lounge area with a blue sofa, a wooden coffee table, and two chairs. The ceiling has circular recessed lights.

OLSSSEN
LEADING IN SMART LOCKERS

We are Olssen.

Driven by the ambition to offer every customer - from small business to international corporate - the smartest and most suitable locker solution.

We think along with the customer in terms of location, application, use of materials, locks and additional functionalities. Together we ensure that your employees, guests or customers can store their (personal) belongings easily and safely.

No matter which application you are looking for, Olssen has the right solution.

Multiple solutions for every industry.

Locker systems can provide a suitable solution for any business. Secure storage of personal property, selling or renting products, drop off & pick up of packages, for example, or controlled product release of company assets: these are just a few examples of the many possibilities.

With our locking solutions you can increase your service to customers, visitors and employees, protect and monitor critical assets, increase your efficiency, and reduce operational costs.

The advantages of smart locking.

Olssen is market leader in the field of lockers with smart locking. Freely translated: the electronic operation of lockers.

For this Olssen is exclusive partner of Keynius, the easiest, most configurable and safest smart locking system on the market. Keynius is despite the many setting possibilities easy to manage and use.

Your lockers have a flexible application and can be used alternately by, for example, your employees, guests, package deliverers and

facility manager. Each locker can be set up separately for each moment.

Users can control the lockers through an app, website, QR code, RFID card, PIN code, access screen and more. Keynius runs in the cloud on the heavily secured Azure platform but can also function offline for a period. About two-thirds of the lockers supplied by Olssen are now equipped with the Keynius locking system.

With Olssen smart lockers you are ready for the future.

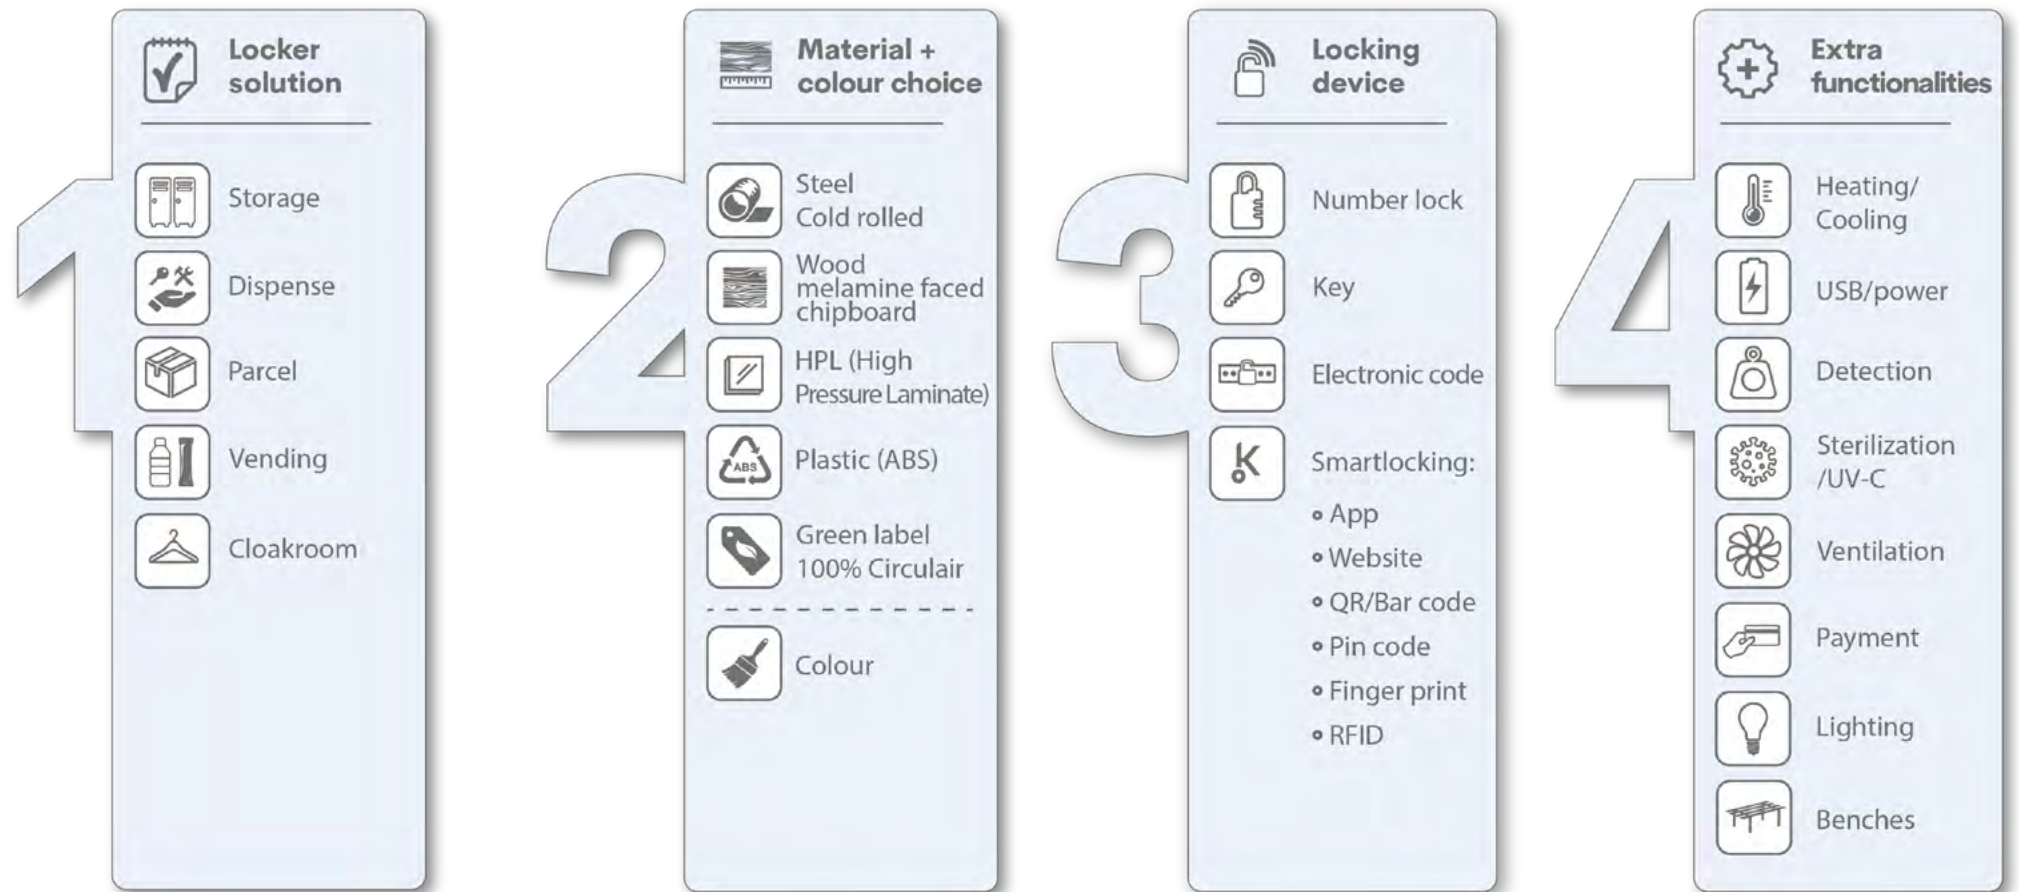

OLSEN
LEADING IN SMART LOCKERS

Only 4 steps needed to create your ideal locker solution.

Evolution traditional locking vs. smart locking

1. Storage.

With our storage solutions, you offer your employees, customers and visitors the opportunity to store their personal belongings safely and easily. Our unique smart locking system guarantees an easy, configurable and safe locker management, suitable for every location and environment.

2. Dispense.

Using Smart lockers to lend, rent or sell products to employees, customers or visitors is easy, efficient, can be used 24/7 and in many cases saves the use of staff. Of course, the lockers are also easy to use for taking in products.

Complete control over your shared assets.

With our locker systems for key, IT & asset management you can easily dispense your company - tools, keys, phones, etcetera - to your employees in a controlled way.

Every user action is automatically recorded so you always have insight into who is using an item and where your products are located. The lost of and damages to assets are minimised, work processes optimised resulting in cost savings.

3. Parcel.

Using a smart locker wall for parcel delivery and pick up provides an extra service to customers and/or employees and - when used in a retail environment - gives an extra boost to your sales.

Modern parcel management with smart locking.

Online retailing has become a standard in today's shopping behaviour. Logistic companies can offer their customers a 24/7 service by using a smart locker wall for dispensing and returning parcels.

4. Vending.

Offering your (company) items effortlessly and with security: that is easy with our wonderful locker systems for vending and rental.

You can let your employees, customers, visitors and passers-by buy or rent items without using staff. Returning rented products is also simple and user-friendly. And you always have visibility of the status and stock of your goods or assets! And good to know that the lockers can also be cooled or heated!

5. Cloakroom.

More and more hospitality venues are using smart locker walls for storage services to visitors. The advantages are numerous: No personel needed, no queues, no theft of goods and an excellent return on investment.

Happy visitors, profitable business case.

For visitors to your venue, the safe storage of their coat and/or bag is very important.

At the same time, employing staff for your (permanent) checkroom is a challenge and a significant cost item. Olssen offers smart, compact customized locker solutions that give your visitors flexibility and do not burden you with staffing problems, theft and loss of space. For many locations, the cloakroom locker is a very interesting business case.

You will quickly earn back your investment!

Olssen Green Label.

The CO₂ footprint of your company increasingly plays a role in your operations. To ensure that the placement and use of smart lockers does not increase your footprint, we have developed a special Green Label locker collection. In it, we offer lockers made from recycled and social steel, 100% circular wood or even from recycled jeans.
